1. Introduction

This report has been prepared by Incomes Data Research (IDR) and, as requested, it provides market salary data for the following role(s):

- Solutions/Software Developer

2. Market salary data

This section presents the market salary data. We aim to provide a minimum of three sources of information for each job to enable ‘triangulation’ of the results, and thereby provide the widest possible assessment of the market for this role.

2.1. Market data

The tables in the following sections provide the aggregate market salary for a full-time Solutions/Software Developer.

2.1.1. NHS data

In this section we provide information on the salary range for the pay band likely to cover comparator jobs in the NHS. The NHS, with 1.2m staff is the largest employer in the UK and as such plays a key role in influencing the market for many non-medical roles, particularly in education, given the links between parts of higher education and the NHS.

IT Software Developer roles in the NHS are typically employed on Band 6 and the current salary range is between £32,306 and £39,027 a year outside of London and high-cost areas in the South East/South.

Roles based in high-cost areas qualify for the following supplements:

- Inner London – 20% of basic salary, subject to a minimum payment of £4,608 and a maximum payment of £7,097;
- Outer London – 15% of basic salary, subject to a minimum payment of £3,898 and a maximum payment of £4,967;

- Fringe – 5% of basic salary, subject to a minimum payment of £1,066 and a maximum payment of £1,845.

2.1.2. IDR data

The following tables contain data from IDR Pay Benchmarker, our online database of salary information. This data has been collected by IDR directly from employers through surveys and bespoke data collection for the IDR Pay Benchmarker service.¹
